

# INOVA® T4R™

The perfect example of leading edge technology, the INOVA® T4R™ is a best-in-class rechargeable LED flashlight. The T4R™ is the most advanced lithium ion rechargeable flashlight available today, combining durability and compact size with lower battery replacement costs. Its high-powered, 303 lumen LED projects a powerful uniform focused spot and flood beam pattern for up to 698 feet. Engineered with the professional in mind, the T4R™ has a 4-function mid-body tactical switch that activates high power, medium power, low power, strobe and momentary high modes. Its aerospace-grade aluminum body has been machined from solid bar stock, with military-spec Type III hard coat anodized black finish and an aggressive knurling pattern for positive grip. Each T4R™ is individually laser engraved with a unique serial number, for instant support and identification of your illumination investment.
